To the Chairman and Members of the  
Alford Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour of presenting my Annual Report for the Year 1971.

The mid-year population estimated by the Registrar General was 2,310.

There were 41 births, two of which were illegitimate a birth rate of 17.7 per 1,000 population, national rate was 16. The illegitimate live births as a percentage of all live births was 5, less than the national rate of 8. There were 30 deaths from all causes giving a death rate of 13.0 per 1,000 population higher than the national rate of 11.6. There were no deaths in infants under one year. The greater number of deaths occurred in persons over 65 years, Ischaemic Heart disease and diseases of the cerebrovascular system were the greatest killers, whilst malignant neoplasm of the lung caused two deaths, one less than the previous year. There were no cases of infectious diseases notified.

On the environment side eleven houses were built, none by the local Authority. A demolition order was made in respect of one house which was demolished, and two houses were the subject of closing orders, no improvement grants were made. Under the Offices, Shops and Railway Premises Act, sixty-one premises were registered, these were frequently visited and twelve defects remedied. Refuse was collected at nine day intervals and disposed by part controlled tipping.

The quality and quantity of water supplied to the town during the year was adequate, there were no bad bacteriological reports. The number of dwelling houses supplied direct from public water mains was 963 and the population served was 2,310. Thirteen houses were supplied by standpipe/outside tap. The natural fluoride content was 0.02 p.p.m.

I take the opportunity of thanking the Health Committee for their interest in the Department and the Public Health Inspector and staff for their co-operation.

I am,  
Your obedient Servant,

A. LOFTUS  
Medical Officer of Health.
